A hand-drawn diagram of a mobile phone home screen. The screen is a rectangle with a status bar at the top. The status bar contains four icons: a triangle in a circle, a person in a circle, a signal strength icon, and the number 35. Below the status bar, the screen is divided into a grid of app icons. The icons are arranged in two rows and four columns. The first row contains icons for 'Agent', 'Stats', 'Photos', and 'Handler Missions'. The second row contains icons for 'Hack', 'Plug', 'Money', and 'Color Codes'. To the right of the screen, there is a battery icon and the text '\$25'. Arrows point from various handwritten labels to the icons and status bar elements. The labels are: 'Agent is on badge (icon)' pointing to the first status bar icon; 'Handler available (icon)' pointing to the second status bar icon; 'Q. badges' pointing to the signal strength icon; 'D. money' pointing to the number 35; 'Agent' pointing to the 'Agent' app icon; 'Stats' pointing to the 'Stats' app icon; 'Photos' pointing to the 'Photos' app icon; 'Handler Missions' pointing to the 'Handler Missions' app icon; 'Hack' pointing to the 'Hack' app icon; 'Plug' pointing to the 'Plug' app icon; 'Money' pointing to the 'Money' app icon; 'Color Codes' pointing to the 'Color Codes' app icon; '\$25' pointing to the battery icon; and 'Battery (different symbol)' pointing to the battery icon. The text 'Different symbol' is written below the battery icon.

This screen retained when badge is unpowered

Badge
type

Could also be a notification area (small icons under, or instead of the handle.)
